

# EARLY DETECTION SAVES LIVES

## LET COMPASS ASSIST YOU WITH PREVENTIVE SCREENINGS

We can't prevent cancer from forming, but we can be diligent about having simple screenings for early detection. Whether you need a mammogram, colonoscopy, skin check, or a full panel of lab work, I am here every step of the way. I know these diagnoses can be frightening, but the first step is knowing where you stand.

I can find highly-rated doctors and facilities in your area, compare costs for non-preventive services, transfer records and verify your coverage for any procedure. Reach out to your Health Pro with your preferred zip code and I will be happy to get started.
